

Echoflex's Technical Advantage

Echoflex Solutions is not only a leader in product development of EnOcean products, we are also an engineering house providing contract services to OEM customers who wish to integrate this technology into their own platforms.

Echoflex has over 100 years combined experience in building controls and > 10 years in EnOcean specific product development. Our team of engineers can take your marketing specification and provide quality hardware and software engineering that works in the real world.

Echoflex can provide you the shortest path between where you are today to where you need to be. Our EnOcean experience together with your application engineering will provide the quick answers on energy harvesting and radio performance based on final application and not laboratory settings.

Echoflex is your surest and safest path to integrating this revolutionary technology into your product lines.
