

EU RoHS 2 Directive 2011/65/EC Compliance

On July 1, 2006, the European Union implemented a ban on new electrical and electronic equipment containing certain environmentally-sensitive materials. This directive – called RoHS (Restriction of Hazardous Substances) – regulates the amount of cadmium, hexavalent chromium, lead, mercury, polybrominated biphenyl and polybrominated diphenyl ethers in electrical and electronic equipment, to prevent them from exceeding limits set forth by the EU.

We are pleased to inform you that Echoflex products meet the requirements of the RoHS 2 EU Directive 2011/65/EC, and is RoHS Directive Compliant.

Echoflex is dedicated to following the EU RoHS directive, as well as similar legislation in individual countries around the world. Our company strives to keep the regulated substances out of our products, thereby reducing pollution and its environmental impact, as well as increasing safety when the products reach the end of their life.
