## Wireless TimeClock

WTC

Product Line:	Wireless TimeClock WTC
Description:	Version 2.1.0 Software
Effective Date:	2024-02-26

## About This Release

This release of WTC software introduces a schedule event feature to design Temporary Configurations. Temp Config lets you replace scheduled lighting events with detailed control far beyond setting a holiday schedule. Now you can control temporary configurations for groups and for parameters (timers and lighting levels) and also control the conditions for reverting to the regular schedule. A new System menu was also added to organize information about the WTC.

Information about linked controllers is no longer available from the WTC. Garibaldi Pro software is the ideal tool to manage wireless projects and configurable device settings. The software is available for download from the Echoflex website.

For information about recent releases, see [Release History on the next page](#).

## Compatibility

This release is compatible with the following Echoflex Solutions software and hardware:

- Garibaldi Pro software (device database update only)
- LED Fixture Controller (ELED1 and ELED1H)
- Tunable White Dimming Controller (ELED2 and ELED2H)
- Tri-Zone Dimming Controller (ELED3 and ELED3H)
- Power Load Controller (ELEDR and ELEDRH)
- Phase Adaptive Dimmer (ER6CD and ER12CD)
- Universal Input-Output Interface (UIO)
- O3-Coordinator

**Note:** To get the latest device type firmware in Garibaldi Pro, select Update Database from the Tools menu.

## Availability

The Wireless TimeClock, model WTC, ships from the factory with software v2.1.0. Field software updates are not required or possible.

## Resources

Please keep this release note with your configuration guide for descriptions of the newest features, changes, and bug fixes. Additional reference material is available for download from the Echoflex website at [echoflexsolutions.com](http://echoflexsolutions.com).

For any questions relating to the contents of this release or the behavior of this software, please contact Echoflex Solutions support at using the information at the bottom of the first page.
